Project Management
Installation

TCP Touchscreens at Auckland Airport.
Travellers through Auckland Airport's new terminal take time to find out more about the airport's Greening The Airport strategy.
Designed and supplied by TCP.

Custom Exhibits
We design and produce interpretive digital media for museums, galleries, cultural and tourist sites. Interactive and linear programmes.

Stingray Bay at Kelly Tarlton's.
Giant interactive touchscreens offer info on demand about local ray varieties.
Designed and produced by TCP.

Digital Signage
Solid state media players to high end network systems. Content creation and scheduling for digital signage networks.

Digital signage system: Mt Ruapehu
Visitors are kept up to date with indoor and outdoor displays with the latest mountain weather and ski field information.

Touchscreens & Multitouch Displays
A wide range of touch solutions. Elotouch monitors, NextWindow multi-touch products, Visual Planet interactive foil for through glass touch windows. Large multi-user, multitouch video walls

Through-glass touch window at Stratford i-Site.
Provides local tourist info 24-hours a day via TCP's unique TouchTerminal system. Works in bright sunlight and night time with auto-light system.
Designed and produced by TCP.

WebTouch
With our unique website reformatting product, we can display any website on a large touchscreen in a public space. Buttons control all viewing, no keyboard or mouse. Virtual on-screen keyboard available if required.

TCP WebTouch well received at TRENZ,
The Tourism New Zealand stand featured a WebTouch controlled touchscreen. The system was noted by TNZ staff and visitors as a much better way to view web at a tradeshow compared to using a notebook PC. Attract loop produced by TCP.

Google Earth on Large Multitouch
A world-leading multitouch application developed by TCP! Google Earth on Large Multitouch uses the latest multitouch and gesture technology to view and tour our planet. Much easier than using a mouse and keyboard. Now we've installed it at Auckland University of Technology's School of Computing.

"Your Google Earth screen is absolutely amazing! It reminded me of my favorite movie — The Minority Report with Tom Cruise."
Professor Sergei Gulyaev, New Zealand SKA Project Leader,
Director of Institute for Radio Astronomy and Space Research,
Auckland University of Technology

Concept/Interpretive

Consulting on how to tell your stories with digital media. We produce multimedia programmes for use in public spaces that use powerful new methods for communicating ideas and information.

Planning the use of suitable hardware and software. We have had many years of experience with a large range of technology systems and can advise what works very well in any situation.

Content Creation

Interface design, graphic design, animation, multimedia production: Content produced with Adobe Flash & Director, MPEG Author, PowerPoint & others.

TouchTerminal

Our own app: a web-based Windows XP system for operating interactive media in public spaces. Built in content management system means you can update anytime. Operates full screen, any resolution supported by the display.

Multitouch Content

We design and create program content for shows featuring the new multitouch and gesture technology on touchscreens and touch windows. Features such as image zooming as found in the iPhone & Windows 7 system are produced.

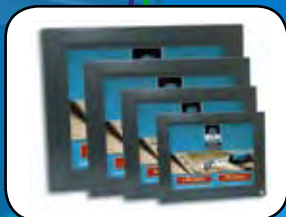

Installation & Support

A full nation-wide installation service for all our products is offered. We also offer ongoing support for our products .

Touchscreens, Multitouch Displays

EloTouch Systems, wall and panel mount from 12" to 32". Digit rear, chassis & panel mount units. High-bright weather proof touch systems suitable for sunlight. iQrite touch frames for large multitouch walls.

All-in-one Touchscreen Systems

No need for a place to put a PC; it's all built in. Osprey MPC range from Digit 12", 15", 17" & 19". HP TouchSmart PC, 19" to 26", customised to prevent tampering in public spaces.

Touch Windows

Through-glass window touch options, Visual Planet foil - fits inside window. LCD/plasma or rear projection options.

AV Displays

LCD & LED professional displays from HP, NEC, Samsung, Sharp and Sony to 85". NEC sunlight readable 46" LCD displays.

NextWindow Touch Systems

Optical touch, integrated or overlaid on displays. NextWindow provides superior touch and multitouch functionality for digital displays as large as 120".

ProDVX F100, F150

These units replace a DVD player. They have no moving parts. Simply copy files to the compact flash card to play. TV resolution and the F150 has VGA out.

iSignager Digital Signage

A stand-alone or networked system. Looping or scheduled content. Optional all-in-one display and media player units. High quality images to 1920 x 1080.

Audio Products

Gilderfluke MP3 solid state media players and show controllers. Wide range of Jansen amps and speakers. PIR sensors for auto play of programmes.

Blackbox AV

Message in a Speaker is an all-in-one audio system for playing MP3 messages when a person approaches. Includes media player and PIR sensor.
