

**Concept/Interpretive**

Consulting on how to tell your stories with digital media. We produce multimedia programmes for use in public spaces that use powerful new methods for communicating ideas and information.

Planning the use of suitable hardware and software. We have had many years of experience with a large range of technology systems and can advise what works very well in any situation.

**Content Creation**

Interface design, graphic design, animation, multimedia production: Programmes made with Adobe Flash & Director, MPEG Author, PowerPoint & others. Video production and digitising, project management and content management systems.

**TouchTerminal**

Our own development: a web-based Windows XP system for operating interactive media in public spaces. Built in content management system means you can update anytime. Operates full screen, any resolution supported by the display. Great for kiosks and through glass touch window systems.

**Multi-touch Content**

We design and create program content for shows featuring the new multi-touch and gesture iTechnology on touchscreens and touch windows. Features such as image zooming as found in the iPhone & Windows 7 system are produced.

**Installation & Support**

A full nation-wide installation service for all our products is offered. We also offer ongoing support for our products.
